

Timber Sash Windows

Preserving the original look of your home

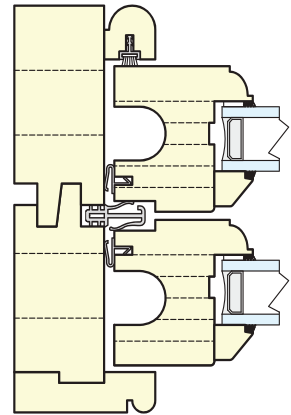

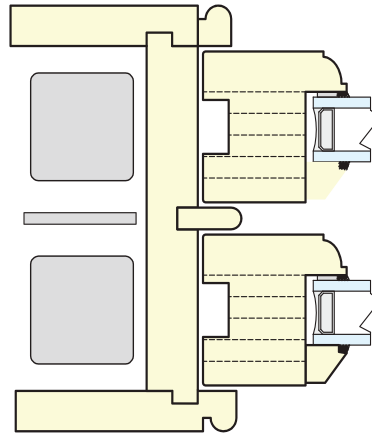

Would you like something different to the ordinary?

HUKE Ltd

MERGING TRADITION WITH 21ST CENTURY EFFICIENCY

The Traditional Sliding Sash Window is very popular throughout the British Isles. The technical design allows for single glazing or provides high-performance double or triple glazing with the application of perimeter gaskets using traditional weights and pulleys or spring balances. The right tooling and CnC Machinery enables the manufacturing of all parts necessary for the construction. Meeting rails can incorporate many different gaskets and decorative horns details can be infinitely variable. At Huke we can manufacture windows that suit various properties, from the classical country cottage to the modern urban house.

TOTAL FACTORY APPLIED PROTECTION

KEY FEATURES

- A Energy Rated Windows
- made to order with cords & weights or modern spiral balance
- high thermal, weather, security and acoustic performance
- slim-line elegant glazing bars available
- quality components with market leading warranties
- restrictors and ironware in gold, satin or chrome

COLOURS & WOOD STAINS:

At Huke you can choose from a wide range of colours and finishes and we will spray paint your chosen windows with 3 coats of high quality TEKNOS paint before installation. That ensures that comprehensive finish is applied all over giving you the desired aesthetics when installed.

- a unique, patented and environmentally friendly process
- high quality water based TEKNOS paint (no solvents)
- Solid painted or stained
- extremely durable against impact, scratches and abrasion
- we can match Farrow&Ball colour range
- 200 RAL colour finishes and stains to choose from
- 10 year warranty

HIGH PERFORMANCE FSC® PURE HARDWOOD TIMBER

Our timber combines high grade quality and structural stability:

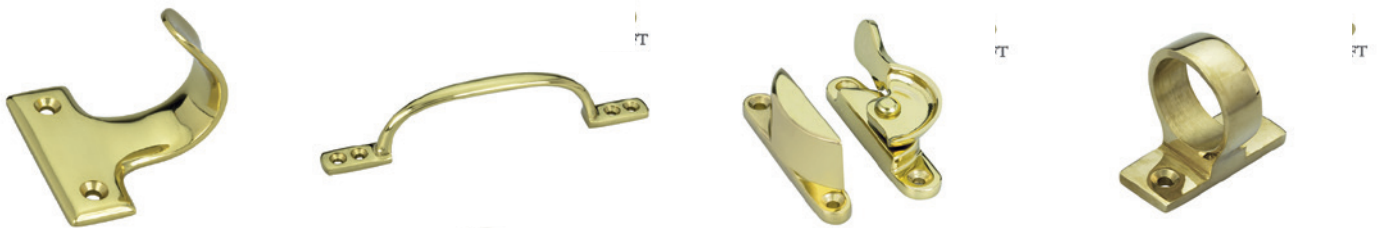

- Responsibly sourced RED GRANDIS – a plantation-grown FSC Pure, knot free, uniform, free from natural defects with stress-free straight grain
- Durable and fungi resistant – independently tested in the UK by TRADA Technology achieving Durability Class 2-3
- Structurally tested – BRE tests also prove D35 structural properties and C36 density
- Excellent consistency in colour, appearance, evenness of grain and workability

We are, as well, a trained user of ACCOYA® wood - a high technology wood which is more durable than teak, redwood or hardwood.

The mark of
responsible forestry
